Comprehensive Neurofeedback Bibliography

D. Corydon Hammond, PhD Professor, Physical Medicine & Rehabilitation University of Utah School of Medicine Frank H. Duffy, M.D., Professor and Pediatric Neurologist at Harvard Medical School, stated in an editorial in the January, 2000 issue of the journal Clinical Electroencephalography that the scholarly literature suggests that neurofeedback should play a major therapeutic role in many difficult areas. “In my opinion, if any medication had demonstrated such a wide spectrum of efficacy it would be universally accepted and widely used” (p. v). “It is a field to be taken seriously by all” (p. vii).

An objective guideline for objectively evaluating the efficacy of neurofeedback treatments:
